Prachi Yadav

Associate Product Manager | Business Analyst

Bengaluru, India | +91 85801 89788 | y16prachi04@gmail.com | linkedin | github | portfolio

Summary

Computer Science undergraduate (CGPA 8.6/10, 2027) targeting Associate Product Manager and Business Analyst roles. Experienced in requirements gathering, user research, journey mapping, PRDs and user stories across B2B, EdTech, healthcare and hiring products. Shipped Vayu AQI, a live air-quality product, end to end; works closely with engineering using SQL, Python and web skills.

Skills

Product Management: Product Discovery, Product Strategy, Roadmapping, Feature Prioritization (RICE, MoSCoW), MVP Scoping, PRDs, User Stories, Acceptance Criteria, KPIs, Product Analytics, Competitive Analysis, User Research, Personas, User Journey Mapping, Wireframing
Business Analysis: Requirements Gathering, Requirements Analysis, BRDs, Functional and Non-functional Requirements, Business Process Mapping, Gap Analysis, Stakeholder Analysis, Workflow Documentation, Data Analysis
Tools and Technical: Agile/Scrum, Sprint Planning, Jira, Notion, MS Excel, Google Sheets, Figma, GitHub, SQL (MySQL), Python, Java, HTML, CSS, JavaScript, PHP

Experience

WaltCorp Jun 2026
Product Designer
- Translated business requirements for a multi-service B2B tech and consulting firm into information architecture, user flows and screens.
- Mapped the client journey into 4 stages (Discover, Explore, Build Trust, Take Action) and prioritized content and CTAs per stage.
- Worked with business and development teams to align scope with user needs, product goals and technical feasibility.

Edneuron Jun 2026 – Aug 2026
UI/UX Designer
- Researched 4 user segments of a medical learning platform, built personas and mapped 4 end-to-end journeys to find key pain points.
- Turned findings into one structure for all 4 journeys: shared discovery, a progress and CME dashboard, and an author publishing path.

Rampwork May 2026 – Jun 2026
UI/UX Design Intern
- Structured the company-side hiring journey of a cross-border talent platform into 4 steps (Discover, Explore, Evaluate, Hire), with clear process steps and calls to action for hiring companies.

Zidio Development Sept 2025 – Nov 2025
UI/UX Intern
- Translated product requirements for an EdTech platform into user-facing concepts that improved how learning content was structured.

Projects

Vayu AQI / *Air-quality forecasting and health alerts, individual project* Live
- Defined and shipped a product that scores each commute by personal pollution exposure, comparing up to 3 routes and departure times.
- Set product rules: suggest a change only if exposure drops 12%+; alert at health-based thresholds (AQI 100, 150 or 200).
- Shipped 24-hour forecasts in 3 languages with privacy-first location; 50 automated tests, load test with 0 failures.

FraudNet-Synth / *Privacy-preserving fraud detection, team of 4* GitHub
- Researched and shaped the approach for 4 banks to train one fraud model without sharing customer data; presented the project.
- Owned the Bank B node and ran the first cross-device test: 10 training rounds with raw data never leaving the device.
- Federated model reached fraud F1 0.796 vs 0.775 for pooled data; the smallest bank's F1 improved by 0.34.

IntervU / *AI voice mock-interview platform* Live
- Conceived the product and built v1: 20 job roles, resume upload and a live voice interview with real-time transcript.
- Product grew to government and private tracks, 11 interview formats, 5 languages and rubric-based answer feedback.

MentorConnect / *Mentorship platform* Live
- Defined requirements and flows for 3 roles (discover, request, book, meet, review); built the PHP/MySQL prototype.
- Set business rules: booking only after acceptance, no double booking, reviews only after completed sessions.

Education

PES Institute of Technology and Management, Shivamogga (VTU) 2023 – 2027 (Expected)
B.E. Computer Science and Engineering CGPA: 8.6/10
